✓ Jennifer Colombo, MD
✓ Christian Lawrence, MD
✓ Kenya McNeal-Trice, MD
✓ Mark Chandler, MD

We have nothing to disclose with respect to this presentation.
As a result of attending this session, you will be able to:

- Define “active learning” for medical learners, including different types of active learning approaches
- List techniques, strategies, and practical online tools (Kahoot, Pick 5, Heads up!, Yammer) for incorporating active learning into medical teaching
- Examine innovative teaching strategies to discuss methods, aims, pedagogical properties, the role of the learners and facilitators, including strengths and possible challenges of various learning situations
- Outline higher-order thinking strategies to increase learner engagement in order to improve retention

Human Bingo

**INTRODUCTIONS: HUMAN BINGO**

**Directions:** Find people who fit these descriptions by asking them questions. Do not show each other your Bingo Card. Write your people names in when they fit the description. You cannot use the same person more than three times and you can’t use your own name on your sheet. Get to know the workshop participants!

Overview of Active Learning
Learning is an active process. We learn by doing. Only knowledge that is used sticks in your mind.

— Dale Carnegie —
What is Active Learning?

• The English scholar, Reginald W. Revans, the originator of “action learning,” had invented and developed this method in the United Kingdom in the 1940s.

• Two Missouri State professors, historian Charles Bonwell and psychologist James Eison coined the term “active learning” (1991).

• Active learning instructional strategies include a wide range of activities that share the common element of - involving students in doing things and thinking about the things they are doing (Bonwell & Eison 1991).
What is Active Learning?

Engage learners in:

• Thinking critically or creatively
• Speaking with a partner in a small group, or with the entire class
• Expressing ideas through writing
• Exploring personal attitudes and values
• Giving and receiving feedback
• Reflecting upon the learning process
Basic Elements of Active Learning

Doing/Engaging

- Reading
- Thinking
- Talking and listening
- Writing
- Involving
- Problem Solving
- Interacting
- Discussing
- Reflecting
- Teaching
- Applying
- Acting
Why Active Learning?

• Increase learner participation and engagement
• Engage learners in deep rather than surface learning
• Take ownership of learning
• Prepare learners for the future is by empowering them in the moment. self-directed
• Promote learner-centered instruction (less lecturing by instructor)
• Promote higher order thinking skills
• Increase learner retention
Why Active Learning?

![Image Source: https://pbs.twimg.com/media/BAKuothCQAAoH1I.jpg](https://pbs.twimg.com/media/BAKuothCQAAoH1I.jpg)
The Theoretical Basis of Active Learning

CONSTRUCTIVIST THEORIES

COGNITIVE CONSTRUCTIVISM (Jean Piaget)
- CONCEPTS
  - Schema
  - Assimilation
  - Accomodation
  - Equilibration
- PRINCIPLES
  - Learning is an active rather than passive process.
  - Learning should be whole, authentic and "real" to be effective.

SOCIAL CONSTRUCTIVISM (Lev Vygotsky)
- Social Interaction
- The More Knowledgeable Other (MKO)
- Psychological Tools
  - Language
- Scaffolding
  - Tutoring
- The Zone of Proximal Development (ZPD)

Image Source: https://www.pinterest.com/pin/335377503492283671/?lp=true
The Theoretical Basis of Active Learning

SOCIAL-COGNITIVE PROCESSES (Cooperative Learning)

ESSENTIAL CONDITIONS:
- Group Reward or Recognition
- Individual Accountability

BLOOM'S TAXONOMY (Benjamin Bloom)
- KNOWLEDGE
- COMPREHENSION
- APPLICATION
- ANALYSIS
- EVALUATION
- CREATION

COMPLEX LEARNING PROCESSES

HIGH LEVEL THINKING (High Order Thinking Skills)
- CRITICAL THINKING
- CREATIVE THINKING MODEL (Calvin Taylor)

CREATIVITY
- COMPONENTS
  - domain-relevant skills
  - task motivation
  - creativity-relevant skills

CONCEPT LEARNING

PROBLEM SOLVING
- CREATIVE PROBLEM SOLVING (Isaksen & Treffinger)
  - Mess Finding
  - Data Finding
  - Problem Finding
  - Idea Finding
  - Solution Finding
  - Acceptance Finding

RECURRENT THEMES (Dewey)
- Avoid jumping to conclusions.
- Examine assumptions.
- Generate new ideas.
- Evaluate evidence.

“The same styles you used earlier may become monotonous over time. You want to remain relevant, so you got to change that style. Reinvent yourself always: You must create a new you” ~Israelmore Ayivor
Micro-Teaching #1: Kahoot
What is Kahoot?

As a teacher
As a student
Socially
At work

Quiz
Choose from multiple answers
Create new

Jumble
Drag answers in correct order
Create new

Survey
Gather audience's opinions
Create new
Why Kahoot?

• Engages learners and allows them to apply their medical knowledge
• Provides instant feedback and gives the presenter an opportunity to teach important topics and key points
• Competition adds a fun element to keep learners engaged
• Helps the learner recognize key terms and buzzwords needed to successfully answer board exam questions
Demonstration

Did you learn something?

Thumbs up Thumbs down

Do you recommend it?

Thumbs up Thumbs down

To continue, tell us how you feel?
You can download results, reaction times and also feedback on an Excel spreadsheet or web page to evaluate the learning of the students and highlight where there may need to be follow up work.
Kahoot Breakout Session

Guided discussion questions:

1. What are the pedagogical characteristics of this innovating teaching method?

2. How to promote higher-order thinking strategies in this teaching method?

3. Can this teaching method be utilized in your teaching situations? If not, what are the most pressing issues that may hinder use of this teaching technique?

4. What else is important to capture in this teaching method?

5. What is the next step or the key takeaways for this active teaching and learning method?
“Spoon feeding in the long run teaches us nothing but the shape of the spoon.”
~ E.M. Forster
Micro-Teaching #2: Pick 5

Making Medical Education Come Alive
Outline of Pick-5 Presentation

• Overview of Pick-5 and why it works
• Game Play of Pick-5
• The Greatest Part of Pick-5
• Variations of Pick-5
What is Pick-5

An interactive, group-based medical educational game with the purpose of building medical knowledge and increasing deductive reasoning skills.
Why does Pick-5 Work?

1. **INVOLVED ADULT LEARNERS**
   - Adults need to be involved in the planning and evaluation of their instruction.

2. **ADULT LEARNERS’ EXPERIENCE**
   - In 1984, Knowles suggested 4 principles that are applied to adult learning.
   - Experience (including mistakes) provides the basis for the learning activities.

3. **RELEVANCE & IMPACT TO LEARNERS’ LIVES**
   - Adults are most interested in learning subjects that have immediate relevance and impact to their job or personal life.

4. **PROBLEM-CENTERED**
   - Adult learning is problem-centered rather than content-oriented. (Kearsley, 2010)
Pick-5 Overall Game Play

- Medical students, residents and attendings are split into 4-6 groups
- Each group requests a finite amount of additional information on History of Present Illness (HPI) section, physical exam section and lab work/imaging section
  - Each group requested additional information and subsequent answers are confidential
- Each group submits top 2 differential diagnosis after the HPI and physical exam sections and a final diagnosis after the lab work/imaging section
  - All answers are kept confidential until the game is completed
HPI: 2-year-old male with no PMHx who presented from the PCP to the ED for evaluation of fever and stiff neck. Two days ago, he developed worsening fatigue and fussiness. Yesterday, he was more limp, sleepier and would initially cry when moved. This morning, he was evaluated by the PCP and found to be febrile to 100.9 and complained of neck pain with movement. No headaches or photophobia. Given these findings, he was sent to the ED for further evaluation.

Additional HPI Questions:
1.

Differential Diagnosis List #1:
1.
2.
3.
4.
5.

Final Diagnosis:
Pick-5 Overall Game Play

- HPI + Three additional questions = 4 minutes total
- Differential Diagnosis #1 = 2 minutes total
- Physical Exam = 2 minutes
- Differential Diagnosis #2 = 2 minutes total
- Lab work-up = 4 minutes total
- Final diagnosis and initial management = 5 minutes total

Total Time = 19 minutes**
Pick-5 Answer Distribution

- Pencil and paper

Welcome to Pick-Five! Please **DO NOT** begin until you are instructed.
# Pick-5 Differential Diagnosis

Break (10 Minutes)
Micro-Teaching #3: Heads Up!
What is Heads Up?

Video Source: https://www.youtube.com/watch?v=PO_ezpX7DwY
Why Heads Up!

- Allows for simple, fun, interactive teaching at any place and any time!
- Provides an opportunity for instant feedback and discussion
- Promotes higher level discussion as opposed to simply guessing the correct answer
- Helps the learner recognize key terms and buzzwords
Demonstration
How to Use Heads Up?

• In order to use Heads Up! You will need to buy the "Build Your Own Deck"

• It is $0.99 to purchase and customize. However, you can keep customizing that ONE deck all you want without paying anymore.

• If you want to save that deck for longer and want another one, THEN you have to buy another Build Your Own Deck for $0.99.
How to Use Heads Up?

• Once you've bought the customizable deck, it will move into the playable deck area.

• Click on it, and press CUSTOMIZE!!
How to Use Heads Up?

- Once you press CUSTOMIZE, you can type in a title. When you have a title you want, click EDIT YOUR CARDS.
- The screenshots show how you will add YOUR CARDS and what the list will look like. Simply click in the space where I have typed "Add Here" and your own words/numbers.
Heads Up! Breakout Session

Guided discussion questions:
1. What are the pedagogical characteristics of this innovating teaching method?
2. How to promote higher-order thinking strategies in this teaching method?
3. Can this teaching method be utilized in your teaching situations? If not, what are the most pressing issues that may hinder use of this teaching technique?
4. What else is important to capture in this teaching method?
5. What is the next step or the key takeaways for this active teaching and learning method?
I Think
I Question
I Design
I Create
I Struggle
I Collaborate
I Try
I Solve
I Invent
I Reflect
I Learn
Micro-Teaching #4: Yammer
What is Yammer?

Yammer is a social networking tool to openly connect and engage across your organization.

✓ Use the Discovery feed to stay on top of what matters, tap into the knowledge of others, and build on existing work
✓ Use your Inbox to view, prioritize, and manage the most important messages and announcements
✓ Search for experts, conversations, and files
✓ Join groups to stay informed, connect with your community, and gather ideas
✓ Join in the conversation, like, reply to, and share posts
✓ Attach a file, gif, photo, or video to enhance your post
✓ Praise someone in your network to celebrate a success, or just to say thanks
✓ Create and edit documents, take notes, and share resources as a group
✓ Use polls to crowd source feedback and get answers fast
✓ Stay connected away from your desk with the Yammer mobile app
Accessing Yammer

Yammer can be accessed using a tile on the RM Unify Launchpad.

Or using the ‘waffle’ in Office 365.
How to Create a Group?

Create a New Group

**INTERNAL GROUP**
To collaborate with people inside your company.

**EXTERNAL GROUP**
To collaborate with people who work at other companies.

Group Name

Group Members

+ Add people to this group by name or email

Who can view conversations and post messages?

- **Public Access**: Anyone in this network can view conversations and post
- **Private Access**: Only group members can view conversations and post
  - List this group in our network's group directory and search results.

Create Group
Public and Private

Public groups
Messages that are posted in a public group in Yammer are displayed in the All Conversations and Unread Conversations view for every member of the group. Additionally, people who are not members of the public group can view messages on the group's page.

Anyone in the network can join a public group.
Public and Private

Private group
Messages that are posted in a private group in Yammer are displayed in the All Conversations and Unread Conversations view for every member of the group.

However, people who are not a member of the private group can't view messages on the group's page.
Private group
Messages that are posted in a private group in Yammer are displayed in the All Conversations and Unread Conversations view for every member of the group.

However, people who are not a member of the private group can't view messages on the group's page.
How to Share Conversation?

Select a group:
- All Company
- 2019 PAS Workshop
- Active Learning Group
- Technology in Education
- PICU Group Calendar
- Microsoft Teams
- Skype for Business

Please review the Summer End User Training Guide, and if you have any questions post them here.

View Full Conversation
Download Yammer App!

Choose your mobile device:

Android      iOS      Windows Phone

Set up and use the Yammer iOS app

1. If you don’t have Yammer installed, download it from the App Store

2. Type your Office 365 work or school account. Tap Log in.
Sample Yammer

Yammer Breakout Session

Guided discussion questions:
1. What are the pedagogical characteristics of this innovating teaching method?
2. How to promote higher-order thinking strategies in this teaching method?
3. Can this teaching method be utilized in your teaching situations? If not, what are the most pressing issues that may hinder use of this teaching technique?
4. What else is important to capture in this teaching method?
5. What is the next step or the key takeaways for this active teaching and learning method?
Tips for Active Learning

✓ Describe your role and responsibilities as a teacher in the active learning setting
✓ State expectations and clarify the role of your learners in the active learning environment
✓ Be assertive, but not defensive, by setting out the value of the learner-centered active learning approach, its benefits for engagement and learning for the learners’ future
✓ Clearly communicate your philosophy on teacher and learner roles in the active learning up front
✓ Incorporate assessments with activities
✓ Start off simple (low risk)
✓ Ask questions and be attentive to learners’ questions
✓ Have learners rely on each other
Challenges/Barriers for Faculty to Use Active Learning Strategies

✓ You cannot cover as much course content in the time available
✓ Devising active learning strategies takes too much pre-class preparation
✓ Large class sizes prevents implementation of active learning strategies
✓ Most instructors think of themselves as being good lecturers
✓ There is a lack of materials or equipment needed to support active learning approaches
✓ Students may resist non-lecture approaches

What are your concerns about using active learning activities and techniques?
Wrap Up

During this session, we have covered the following items:

• Explained the origin of “active learning” (Bonwell & Eeison, 1991) with the theoretical basis (Constructivist Learning Theory) including different types of active learning approaches

• Illustrated active teaching techniques=strategies, and introduced practical online tools (Kahoot, Pick 5, Heads up! Yammer) for incorporating active learning into medical teaching

• Examined the four teaching strategies above to discuss methods, aims, pedagogical properties, the role of the learners and facilitators, including strengths and possible challenges of various learning situations

• Discussed the higher-order thinking strategies to increase learner engagement in order to improve retention
Quick Reflection

1. What are the **three things you gained** from this workshop?
2. What are the **two things you will use** right away?
3. What is **one thing you want to learn** more about?
