

Toddler Tibia Fracture - Mepilex Foam Secured with Tape

1. Cleanse wound with sterile saline and gauze
2. Dry thoroughly with gauze
3. Apply a square of Mepilex over the wound (silicone side touches wound)
4. Secure with 1-2 pieces of Primafix tape
5. Change every other day and when falling off or saturated

These guidelines do not establish a standard of care to be followed in every case. It is recognized that each case is different and those individuals involved in providing health care are expected to use their judgment in determining what is in the best interests of the patient based on the circumstances existing at the time. It is impossible to anticipate all possible situations that may exist and to prepare guidelines for each. Accordingly these guidelines should guide care with the understanding that departures from them may be required at times.
