

Acute Gastroenteritis in the ED/UCC - Culture Stool

- Culture Stool: E. coli 0157, Salmonella, Shigella, Campylobacter, Yersinia & Enterohemorrhagic E. coli
 - Test for bacterial enteritis
 - <https://www.childrensmercy.org/testdirectory/TestView.aspx?id=360>
- Culture Stool: Plesiomonas & Aeromonas
 - This test is for bacterial enteritis, but **not** routinely
 - Select this test **only if** routine bacterial culture is negative and the patient is still symptomatic
 - <https://www.childrensmercy.org/testdirectory/TestView.aspx?id=358>

These guidelines do not establish a standard of care to be followed in every case. It is recognized that each case is different and those individuals involved in providing health care are expected to use their judgment in determining what is in the best interests of the patient based on the circumstances existing at the time. It is impossible to anticipate all possible situations that may exist and to prepare guidelines for each. Accordingly these guidelines should guide care with the understanding that departures from them may be required at times.
